

# ADENIYI JAMES OLAOLU

Cloud & DevOps Engineer | AWS | Kubernetes | CI/CD Automation | Infrastructure as Code

Lagos, Nigeria | adeniyijames06@gmail.com | +234 816 247 2147 | [LinkedIn](#) | [Portfolio](#) | [Technical Blog](#)

## PROFESSIONAL SUMMARY

AWS-focused Cloud and DevOps Engineer with 5+ years of experience leading cloud migrations, building CI/CD pipelines, and automating infrastructure with Terraform and Kubernetes. Led a full migration from traditional infrastructure to AWS, cutting infrastructure provisioning time from hours to under 30 minutes and application deployment time from ~40 minutes to under 15 minutes. Skilled in containerization, observability (Prometheus/Grafana), and DevSecOps practices, with a track record of reducing incident detection time and operational toil across production environments. AWS Certified Cloud Practitioner.

## CORE TECHNICAL SKILLS

**Cloud Platforms:** AWS (EC2, VPC, ECS/EKS, S3, RDS/Aurora, IAM, ECR, App Runner, Elastic Beanstalk, Bedrock) · Microsoft Azure  
**Infrastructure as Code:** Terraform · AWS CloudFormation · AWS CDK · Ansible · Bicep  
**Containers & Orchestration:** Docker · Kubernetes (Pods, Deployments, Services, ConfigMaps) · Helm · Argo CD · Argo Rollouts · Amazon ECS/EKS  
**CI/CD & Automation:** GitHub Actions · Jenkins · GitLab CI · AWS CodePipeline · AWS CodeBuild · GitOps  
**Observability & Monitoring:** Prometheus · Grafana · Amazon CloudWatch · AWS X-Ray · SonarQube  
**Security & Compliance:** IAM (RBAC) · AWS Secrets Manager · KMS Encryption · DevSecOps · Container Image Scanning · GDPR-ready Architectures  
**Networking & Systems:** VPC Design · Subnetting · Load Balancing · Auto Scaling · Route 53 · Linux · Windows Server · SSH · DNS  
**Languages & Scripting:** Python · Bash  
**Practices:** Agile/Scrum · SRE Principles · Disaster Recovery Planning · Cost Optimization

## PROFESSIONAL EXPERIENCE

- Senior Cloud and DevOps Engineer | First Digital Holdings LLC (Remote – Ireland)

Oct 2025 – Present

  - Led the organization’s transition from traditional infrastructure to **AWS**, migrating **10+ core workloads** and establishing the company’s first centralized cloud infrastructure.
  - Reduced infrastructure provisioning time from several hours to **under 30 minutes** by implementing **Terraform-based Infrastructure as Code**.
  - Built CI/CD pipelines that reduced application deployment time from ~40 minutes to **under 15 minutes**, enabling faster, more consistent releases.
  - Containerized **15+ application services** with **Docker** and introduced **Kubernetes** deployment workflows, improving consistency across development and production.
  - Implemented **Prometheus and Grafana** monitoring across production infrastructure, reducing incident detection time by an **estimated 50%**.
  - Own the AWS environment post-migration — managing cloud infrastructure, deployments, security, monitoring, scaling, and operational reliability.
- DevOps Intern | Secure Sight Facilities

Mar 2025 – Aug 2025

  - Supported development and maintenance of CI/CD pipelines, automating build, test, and deployment workflows across development environments.
  - Containerized **10+ application components** using Docker, improving consistency across dev, test, and deployment environments.
  - Assisted in deploying and managing applications on AWS, gaining hands-on experience with **EC2, IAM, and ECR**.
  - Supported Kubernetes deployments across development environments, working with Pods, Deployments, Services, and ConfigMaps.
  - Automated recurring operational tasks using **Bash and Terraform**, reducing manual configuration work.
  - Assisted senior engineers with infrastructure troubleshooting and deployment issues, helping resolve **20+ operational incidents** during the internship.
- Junior DevOps Engineer | TechNova Solutions

Mar 2023 – Jan 2025

  - Built and maintained CI/CD pipelines using **Jenkins and GitHub Actions**, automating builds, testing, and deployments across development and staging.

- Provisioned and managed AWS infrastructure using **Terraform**, reducing manual environment setup and improving consistency.
- Deployed and maintained applications on Kubernetes, managing Pods, Deployments, Services, ConfigMaps, and application scaling.
- Troubleshot Linux servers, failed deployments, and container issues, resolving **30+ incidents** and supporting reliable application delivery.

#### **System Administrator** | Apex Digital Solutions

*Mar 2021 – Feb 2025*

- Managed **20+ Linux and Windows servers**, handling configuration, updates, user access, and routine maintenance.
- Monitored server CPU, memory, disk usage, and availability to maintain stable day-to-day operations.
- Resolved **50+ server, network, and application issues**, troubleshooting DNS, SSH, connectivity, and permissions.
- Automated routine administrative tasks with Bash scripts, reducing repetitive manual work.
- Managed user accounts, permissions, SSH access, backups, and firewall configurations across company systems.

#### **Founder & Technical Writer** | OpsSphere (Technical Blog)

*Apr 2026 – Present*

- Founded and maintain a technical blog documenting real-world DevOps and cloud engineering work, covering CI/CD, Kubernetes, infrastructure as code, and cloud security.
- Translate complex distributed-systems and DevSecOps concepts into practical engineering guides for cloud and platform engineers.

#### **CERTIFICATIONS**

---

- AWS Certified Cloud Practitioner
- Introduction to Linux (LFS101)
- Introduction to Jenkins (LFS167)
- Introduction to Kubernetes (LFS158)

#### **EDUCATION**

---

**B.Eng. in Electrical and Computer Engineering** — Kwara State University, Nigeria · Class of 2026 · CGPA 3.53, Second Class Honours
